iUDI Plate LACEseq

I. Introduction

iUDI Plate LACEseq unique dual index plate contains unique dual-indexed PCR primers for amplification of indexed Illumina®-compatible NGS libraries. These primers can be used in LACEseq kit that requires TruSeq™-Compatible Indexing Primers.

iUDI Plate LACEseq contains indexed PCR primers and offer up to 16 pair unique dual indexes for multiplexing up to 16 or 24 samples. The 16/24 indexed PCR primers are supplied pre-dispensed in 96-wells PCR plate (Cat. Number #LS-UDI-001-16, Cat. Number #LS-UDI-002-24 and Cat. Number #LS-UDI-003-24). Each dual index is provided in sufficient amounts for two reactions.

All indexes have been functionally validated to work with Illumina sequencing systems using two- or four-channel chemistry for base calling.

II. List of Components

Store all components at -20°C.

Product name	Cat. No.	Concentration	Volume per tube
iUDI Plate LACEseq set 1 – 16	#LS-UDI-001-16	20 µM total (10 µM each Primer)	4 µl
iUDI Plate LACEseq set 2 – 24	#LS-UDI-002-24	20 µM total (10 µM each Primer)	4 µl
iUDI Plate LACEseq set 3 – 24	#LS-UDI-003-24	20 µM total (10 µM each Primer)	4 µl

III. General Considerations

A. Best Practices

- It is not recommended to subject iUDI Plate LACEseq index plates to more than five freeze/thaw cycles.
- Prior to use, remove the lid. Thaw for 10 minutes at room temperature, then spin the plate to pellet contents at the bottom of the tubes. Ensure the plate show no visible condensation prior to opening. **Keep the plate on ice during use.**
- When preparing the indexing PCR, pierce the seal of the plate using a pipette tip, then directly pipet the required volume of your indexing primers. Always use a separate pipette tip for each well to avoid cross contamination of indexes. Seal again the plate after usage to avoid spillover.

B. Product Compatibility

The iUDI Plate LACEseq plate are designed for use with the LACEseq™ and PAGExt™ IMMAGINA products (Catalog no #LS-001 and Catalog no #KGE-002). Please refer to the LACEseq™ and PAGExt™ kit-specific user manual for instructions on using the indexed PCR primers provided in the iUDI Plate LACEseq plate. Primer Pairs are not methylated.

NOTE: No additional PCR reagents are provided with this index set. The required enzymes and buffers are provided with the respective main kit (LACEseq™ Library Prep Kit for Illumina).

C. Multiplexing and Index Pooling

It is important to select appropriate single indexes that are unique and meet the Illumina-recommended compatibility requirements. The indexes of the LACEseq iUDI primer pairs are color-balanced in sets of four (1-4, 5-8, 9-12, 13-16). Indexes within each group of four are fully color balanced and can be pooled for sequencing. Less than four samples can be multiplexed, but verify color balance before pooling. Do **not** pool libraries across a row.

Use the "ImmaginaExampleImmagina_SampleSheet" as input file to your sequencer, instead of creating a sample sheet using Illumina Experiment Manager. Use this sheet as an input file to your sequencer, make sure to change the parameters, such as Workflow, Application, Reads, Sample name, Indexes as per your experiment.

We do not recommend multiplexing Immagina libraries with libraries from other vendors in the same sequencing lane. Though this is possible in principle, specific optimization of index combinations, library pooling conditions, and loading amounts may be required. Sequencing complex pools that include different library types at different lane shares may have unpredictable effects on sequencing run metrics, read quality, read outputs, and / or demultiplexing performance. Immagina assumes no responsibility for the altered performance of Immagina libraries sequenced in combination with external library types in the same lane (or run).

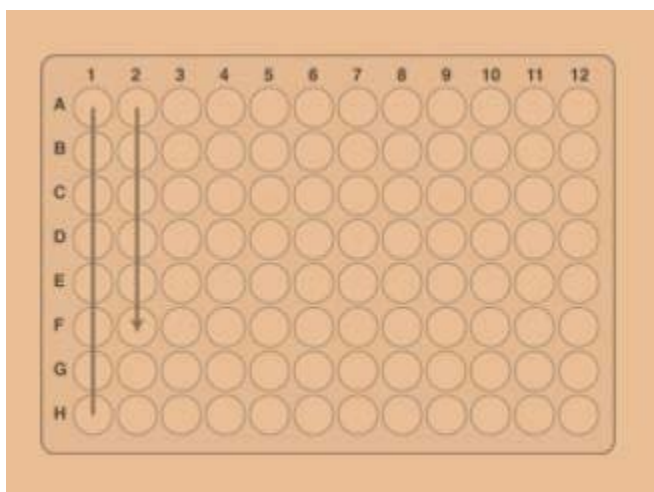

Figure 1. Index map and multiplexing strategy for the UDI Plate LACEseq plates (Cat. No. #LS-UDI-001-16, Cat. Number #LS-UDI-002-24 and #LS-UDI-003-24). We recommend pooling indexes down a column in group of four. Do not pool libraries between rows.

IV. iUDI LACEseq Plates Unique Dual Index Sequences (three different plates are available)

Set 1.

In the iUDI LACEseq Plate **iUDI Plate LACEseq set 1 – 16, Cat. Number #LS-UDI-001-16**, the unique dual indexes (LU1-LU16) are 8-nt long i5 and i7 dual index sequences (Table I).

IMMAGINA index name	Well position	i5 index (HiSeq [®] 2000/2500 MiSeq [®] , NovaSeq [®] Illumina systems)	i5 index (NextSeq [®] Illumina systems)	i7 index (all Illumina systems)
LU1	A1	ATATGCGC	GCGCATAT	CTGATCGT
LU2	B1	TGGTACAG	CTGTACCA	ACTCTCGA
LU3	C1	AACCGTTC	GAACGGTT	TGAGCTAG
LU4	D1	TAACCGGT	ACCGGTTA	GAGACGAT
LU5	E1	GAACATCG	CGATGTTC	CTTGTCGA
LU6	F1	CCTTGTAG	CTACAAGG	TTCCAAGG
LU7	G1	TCAGGCTT	AAGCCTGA	CGCATGAT
LU8	H1	GTTCTCGT	ACGAGAAC	ACGGAACA
LU9	A2	AGAACGAG	CTCGTTCT	CGGCTAAT
LU10	B2	TGCTTCCA	TGGAAGCA	ATCGATCG
LU11	C2	CTTCGACT	AGTCGAAG	GCAAGATC
LU12	D2	CACCTGTT	AACAGGTG	GCTATCCT
LU13	E2	ATCACACG	CGTGTGAT	TACGCTAC
LU14	F2	CCGTAAGA	TCTTACGG	TGGACTCT
LU15	G2	TACGCCTT	AAGGCGTA	AGAGTAGC
LU16	H2	CGACGTTA	TAACGTCG	ATCCAGAG
