- Ability to recognize and offer solutions to customer related issues
- High Initiative and self-driven
- Self-motivated with a strong desire to succeed
- Excellent presentation, communication and interpersonal skills
- Team-orientated and highly flexible
- Knowledge of Next Generation Sequencing technologies and applications desirable
- Proven knowledge and relationship into relevant academic research facilities in the UK
- Native in English, ideally fluent in one other major European language

## **What to expect:**

- Attractive salary and benefits package
- Working in a fast growing and innovative biotech company
- Selling cutting-edge technologies into high-profile academic centers and leading biotech
- Being part of an inspiring atmosphere with a young and dynamic team of scientists

## **About Us**

IMMAGINA Biotechnology has been operating since 2014 as a research-driven SME business operating in the sector of Genomics, Proteomics, and Enabling Technology. We develop sophisticated tools to capture ribosomes in an active state and characterize their components. Our technologies allow for simultaneous measurement of newly synthesized proteins and their corresponding RNA templates and deliver the highest level of correlation between gene expression and the proteome. IMMAGINA is expected to fully underpin the immense diagnostic potential of a recently developed product portfolio for better decisions in precision medicine and better health.

Our mission is to empower scientists to discover the mechanism of translational control involved in many diseases, with the main focus on ribosomes. We aim to bring to the market breakthrough solutions to solve scientists' and patients' needs. We can do that thanks to a hybrid business model that embraces both business and sales expansion and a strong clinical diagnostic development
